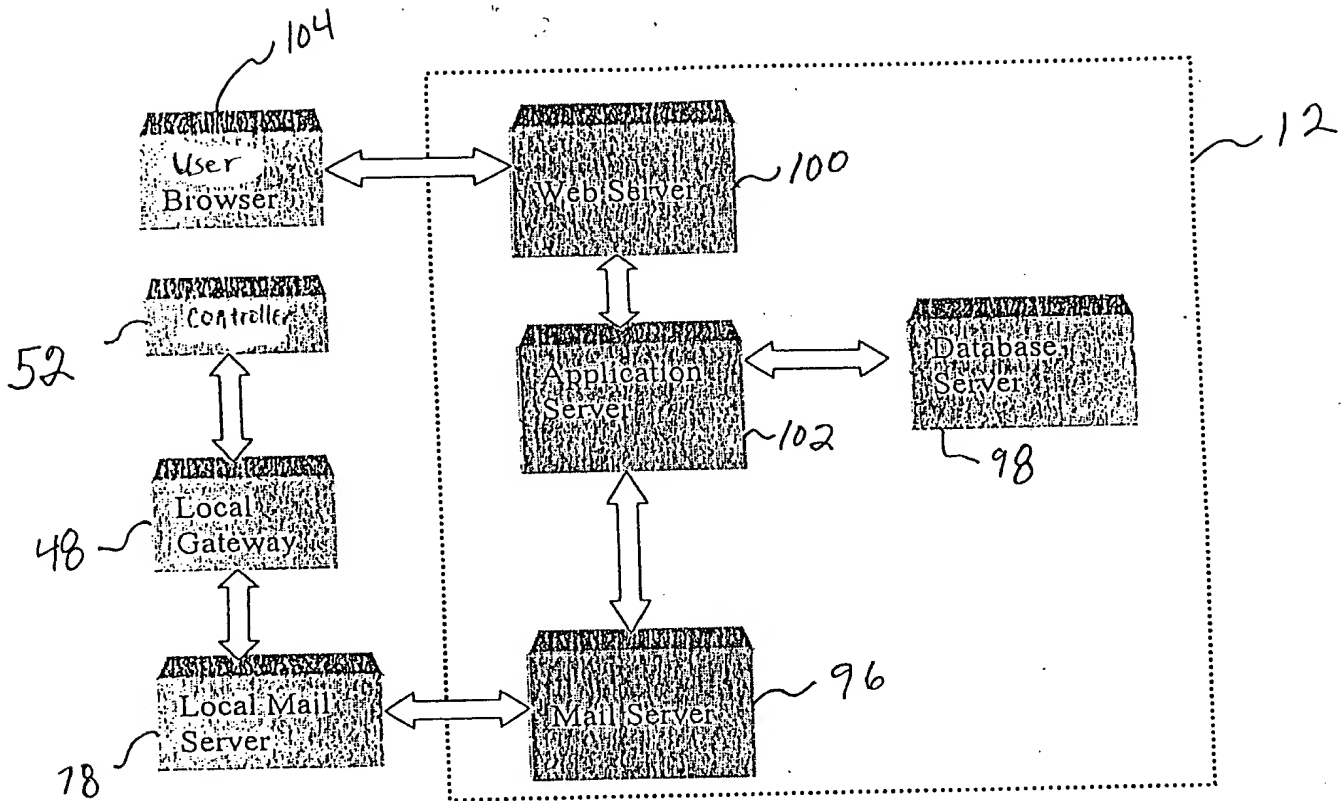

FIGURE 3

The diagram illustrates a Local Gateway system architecture. A central dashed box labeled "Local Gateway" (48) contains two main components: a "Gateway Server Component" (106) and an "E-Mail Agent Component" (108), which are connected by a vertical double-headed arrow. To the left of the Local Gateway is a "Controller For Locking Device" (52), connected to the Gateway Server Component (106) by a horizontal double-headed arrow. To the right of the Local Gateway is a "Local Mail Server" (78), connected to the E-Mail Agent Component (108) by a horizontal double-headed arrow.
